

# How to Assemble the camping shadow box

When assembling your camping shadow box, begin with layer 1 and add each layer on top of the last one. The 13th layer is not labeled so it doesn't show. The file is 8 inches by 8 inches but is fully scalable. It is suggested to be at least 8 by 8 inches because of small details. Attach the layers using your preferred adhesive and then enjoy your camping shadow box!
